Plaintiffs seek, pursuant to ORCP 32, to have their statutory wage and hour civil
 damage case certified as a class action; the class to be identified as all current and former
 employees of Defendants who worked for one or both Defendants in Oregon at any time
 between March 22, 2007 and March 22, 2013 and who are also members of one or more of
 the following subclasses:

 Point Click Care ("PCC") Class – Hourly employees who used Point Click Care, an electronic health record and patient charting system, and whose work time was also recorded in Kronos, Defendants' electronic time keeping system;

Page 1 – ORDER

<ul> <li>Defendants' Money Network System pay card;</li> <li>3.) Meal Period Class – Hourly employees who were required to take a full 30 minute meal period; and</li> <li>4.) Late Pay Class – Hourly employees whose employment ended between March 22, 2010 and March 22, 2013 and who are also members of the PCC Class, the Pay Card Class or the Meal Period Class.</li> <li>7 The Defendants oppose class certification.</li> <li>8 I. Findings of Fact</li> <li>1.) Defendants, assisted care living facilities located in Medford and Coos Bay, are owned by Avamere Health Services.</li> <li>2.) Plaintiff Renee Maza, a non-exempt hourly employee, worked as a Certification Medication Aide at Waterford between December 29, 2011 until her termination on January 4, 2013.</li> <li>3.) Plaintiff Steve Price, both an exempt and non-exempt employee, worked as a receptionist and as an admissions coordinator at Waterford between August 23, 2011 until her termination on January 4, 2013.</li> <li>4.) Plaintiff Steve Price, both an exempt and non-exempt employee, worked as a Resident Care Manager (exempt) and as a charge nurse (non-exempt) at both facilities between January 18, 2010 and his termination on January 23, 2013.</li> <li>5.) Avamere established uniform human resource policies and procedures for both facilities during the relevant time period. Those policies and procedures are, for the most part, contained in a uniform Employee Handbook.</li> <li>6.) Avamere established a uniform tere established uniform knon-exempt employee timekeeping procedure and practice through the implementation of an electronic timekeeping system called Kronos. Through this system, hourly employees were essentially required to "clock" in and out in order for their work time to be recorded. Page 2 – ORDER

charting, a recognized job duty for which the employee would be paid, was to be through PCC. In order to perform electronic charting, employees were required to go through a log on and off procedure with PCC.

8.) Non-exempt employees were also uniformly entitled to an unpaid 30 minute dutyfree lunch period.

9.) Avamere's Employee Handbook admonished employees that they were ultimately responsible for accurately recording their work time, to not perform any work when not on-the-clock, to record their lunch period-time and to report incidents when they didn't receive their full 30 minute lunch period. Employees were also allowed to correct time-keeping mistakes after the fact by completing edit slips.

10.) In the Fall, 2011, Avamere established a uniform policy that all non-exempt employee final wages following voluntary or involuntary separations would be paid by a pay card called a Money Network System pay card. Separated employees were not allowed to elect to receive their final payment by check or any other method. In using the pay cards at ATM's a fee would be charged, unless it was used at a Wal-Mart store.

11.) All three Plaintiffs encountered circumstances where they were performing patient charting on PCC, but were not logged onto Kronos and were, thus, not being paid for the charting work they were performing. This occurred primarily when they were charting off-the-clock from a remote computer and/or after their scheduled hours of work.

12.) Through discovery of Defendant's Kronos and PCC computerized records (Ex.57),
Plaintiffs' counsel developed information through which they have reasonably
estimated that the PCC class size for similarly situated employees could be at least
220 members.

13.) All three Plaintiffs encountered incidents where their lunch break period was less than 30 minutes and for which they were not paid for a full 30 minute lunch break as required by law.

14.) Through discovery of Defendants' Kronos computerized records (Ex.58), Plaintiffs developed information through which they have reasonably estimated that the Pay Period class size for similarly situated employees could be at least 390 members.

Page 3 – ORDER

1	15.) At their time of separation, Plaintiffs Maza and Real received their final wages by
2	pay card.
3	16.) Through discovery, Plaintiffs developed information (Ex.56) through which they
4	have reasonably estimated that the Pay Card class size for similarly situated
4	employees could be at least 150 members.
5	17.) The Late Pay class size, estimated by Plaintiffs to be 245 members, is composed
6	of members of the other three classes who were not paid all the wages they were due
7	at time of separation.
8	III. <u>Legal Analysis and Conclusions</u>
	A.) <u>Overview</u>
9	Whether or not a trial court should certify a case as a class action is controlled
10	by ORCP 32 A and B. A case can only be certified as a class action if all the following
11	requirements under 32 A are met:
12	1.) The class is so numerous that joinder of all members is impracticable
13	(numerosity);
	2.) There are questions of law or fact common to the class or classes
14	(commonality);
15	3.) The claims or defenses of the representative parties are typical of the claims
16	or defenses of the class (typicality);
17	4.) The representative parties will fairly and adequately protect the interests of
18	the class (adequacy and fairness); and
	5.) The representative parties have complied with the pre-litigation notice
19	provisions of ORCP 32 H.
20	If all of the requirements of ORCP 32 A are satisfied the trial court must also
21	find, under ORCP 32 B, that a class action is superior to other available methods for
22	the fair and efficient adjudication of the case. In making this finding, the court must take
	into consideration each of the following factors identified in that subsection:
23	1.) The risk of inconsistent or varying adjudications with respect to class
24	members which would establish incompatible standards for the Defendants; or
25	the risk of the dispositive effects of piecemeal litigation by class members on
26	other potential members not parties to those adjudications;

Page 4 – ORDER

1	2.) The extent to which relief sought is in the nature of injunctive or declaratory
2 3	relief; 3.) The extent to which questions of law or fact common to the members of the
4	class predominate over questions only affecting individual class members <sup>1</sup> ;
5	<ol> <li>The interests of members of the class in individually controlling actions to which they have a pecuniary interest;</li> </ol>
6	5.) The extent and nature of pending litigation concerning the same issues by
7	other class members;
8	6.) The desirability of concentrating the litigation in the forum chosen;
0	7.) The difficulties likely to be encountered in the management of the class
9	action that would be eliminated by another method of adjudicating the dispute;
10	and
11	8.) The sufficiency of the amount in controversy when considering the
12	complexities of the issues involved and the expenses of litigation.
	B.) <u>Subclass Analysis Under 32 A.</u>
13	1.) Initial Determinations Common To Subclasses
14	a.) Under these circumstances, the Court concludes that the adequacy
15	and fairness requirement has been satisfied. There is no challenge
16	based upon potential conflicts or antagonism between class
	representatives and class members and the Court further finds that
17	Plaintiffs' counsel is well experienced in handling class actions,
18	including those that involve employee wage and hour claims. The Court
19	rejects Defendants arguments to the contrary.
20	b.) The Court finds that Plaintiffs' counsel complied with the notice
21	requirements of ORCP 32 H.
22	
23	
	<sup>1</sup> Prior to 1992, a class could not be certified unless common questions of law or fact
	predominated over individual questions. Since then, this absolute requirement has been eliminated, so now it is only one factor among eight in the court's determination whether the class action method is
	superior. <u>See, <i>Pearson v. Phillip Morris, Inc.</i>,</u> 257 Or App 106, 121-122 (2013): <u>rev</u> . <u>all'd</u> , 354 Or. 699(2014) For the same reason, ORCP 32 is more flexible than FRCP 23 which maintains the
26	predominance standard as the "sine qua non" of class certifications. <u>Wal-Mart Stores, Inc. v. Dukes,</u> 131S. Ct. 2541, 2551 (2011).

# Page 5 – ORDER

1	c.) Based upon findings 12, 14 and 16, the Court finds that numerosity
2	has been satisfied with respect to all proposed subclasses.
3	2.) <u>PCC Class</u>
	a.) <u>Commonality</u>
4	The Court of Appeals in <u>Pearson, supra</u> recently explained how
5	the commonality factor should be applied:
6	"As the cases illustrate, when determining whether a question is
7	common or individual, the court is determining how the question
8	should be litigated; it is not resolving the question itself. In other
	words, it is determining whether it is possible and appropriate for
9	the parties to litigate the question through evidence common to
10	the class, which depends on the likelihood that valid conclusions
11	can be drawn about the class as a whole. That, in turn, depends
12	on the likelihood that, at the times relevant to the disputed
13	question, the putative class members were similarly situated or
	acted in a similar manner." <u>Id</u> . at 156
14	<u>See also, Delgado v. Del Monte Fresh Produce, N.A., Inc.,</u> 260 Or. App.
15	480, 490 (2014)
16	The Court finds that there are both questions of fact <u>and</u> law that
17	are common to this subclass. Common questions of fact include:
18	1.) Did the Defendants use Kronos as a means to record and track all
	work hours performed by their non-exempt hourly employees?
19	2.) Did the Defendants require their hourly employees to use PCC to
20	perform all patient charting?
21	3.) Is patient charting "work" that requires wage remuneration?
22	4.) Is there time worked in PCC by hourly employees that was
23	performed off the Kronos time clock and for which wages were not paid?
	The outcome of this claim can also be resolved through common
24	questions of law under Oregon statutory wage and hour laws. <u>See</u> ORS
25	Chapters 652 and 653.
26	

Page 6 – ORDER

Even though, for the sake of argument, there may be issues raised by 1 the Defendants that require a differential analysis (i.e. Defendant's "knowledge" 2 that particular employees were logged into PCC while off-the-clock or whether 3 particular employees filled out time-edit slips after the fact so that they were 4 paid for work performed off-the-clock) those inquiries are also common 5 guestions that need to be resolved. Defendants' contentions will also be 6 discussed further below on the issue of predominance. Commonality has been satisfied. 7 b.) Typicality 8 Typicality was defined by the Oregon Supreme Court in Newman 9 v. Tualitin Development Co., Inc., 287 Or. 47 (1979) as follows: 10 "[A] plaintiff's claim is typical if it arises from the same event or practice or course of conduct that gives rise to the claims of 11 members and his or her claims are based on the same legal 12 theory" Id. at 50 13 Plaintiffs have easily established that the Plaintiffs' claims are 14 typical under the above definition. 15 c.) Conclusion This Court finds that this subclass satisfies the provisions of 16 **ORCP 32 A.** 17 3.) Meal Period Class 18 a.) Commonality 19 The Court finds there are questions of fact and law that are 20 common to this subclass, which include: 1.) Did the Defendants use Kronos as a means to record and track all 21 work hours performed by their non-exempt hourly employees? 22 2.) Were all full time hourly employees entitled to a duty free 30 minute 23 lunch break? 24 3.) Were all employees required to clock off for lunch and clock back in following their 30 minute lunch break? 25 26

1	4.) Does Kronos disclose that class member's 30 minute lunch periods
2	were interrupted by having to clock back onto Kronos less than 30
3	minutes into their break?
4	5.) Are those affected employees legally entitled to a fully paid 30
	minute lunch break period for every lunch period that was interrupted?
5	Defendants launch a strenuous objection to Plaintiffs'
6	commonality assertion primarily on the basis that the Oregon
7	Administrative Rules permit an exemption based on undue hardship as
8	a result of health and safety considerations of their patients. This
	argument is, again, more of an attack that individual issues predominate
9	over common issues and that will be discussed in greater detail under
10	the Court's ORCP 32 B analysis. The Court, nevertheless, concludes
11	that commonality has been satisfied.
12	b.) <u>Typicality</u>
13	I find that the typicality requirement has been satisfied as all
	three Plaintiffs experienced unpaid shortened meal periods.
14	c.) <u>Conclusion</u>
15	The Court finds that this subclass satisfies the provisions of
16	ORCP 32 A.
17	4.) <u>Pay Card Class</u>
	a.) <u>Commonality</u>
18	Similar to the previous two subclasses discussed, the Pay Card
19	Class has common questions of fact and law, including:
20	1.) Did all non-exempt hourly employees receive their final payment of
21	wages by Defendants' Money Network System pay card?
22	2.) Did each employee agree to receive their final payment of wages by pay
	card?
23	3.) Do ATM fees constitute an unlawful employer deduction for those
24	separated employees who used their pay cards at ATM's other than at Wal-
25	Mart stores?
26	Again, Defendants' argue that the issues are predominately

Page 8 – ORDER

JACKSON COUNTY CIRCUIT COURT 100 SOUTH OAKDALE MEDFORD, OR 97501

1       dissimilar because, at least with respect to the second question por         2       above, an individualized determination must be made with respect         3       whether class members agreed or gave consent to receiving their         4       when predominance is analyzed. member-specific inquiries predominate over other common issues, thus destroying the cohesive nature of the class. Each will be discussed in turn.

a.) PCC Subclass

## 1.) Proof of the Defendants' Knowledge

Defendants aptly point out that for them to be found liable for failure to pay wages while employees were logged onto PCC, but not also at the same time logged onto Kronos, Plaintiffs must prove that Defendants either knew or should have known that practice was occurring. In addition to their policies and procedures, including their Employee Handbook, expressly forbidding the performance of any work off-the-clock, Defendants argue that the resolution of this issue will require an individual inquiry to determine whether management knew that one or more of the Plaintiffs or class members were performing work (i.e. while on PCC) off-the-clock.

However, just as the Court of Appeals concluded in <u>Pearson</u> that the issue of reliance could be litigated and resolved on a class wide basis (<u>Id</u>. at 156), so too can the issue of knowledge. This is ultimately a jury question and it is for them to determine whether the information Defendants had available (i.e. the PCC and Kronos computer data) was sufficient to put them on notice to justify a finding that Defendants knew or should have known this practice was occurring.

#### 2.) Damage Issues

There is also concern that damages could be exaggerated or inflated simply by comparing the data in Kronos and PCC and then performing the arithmetic, because that would preclude Defendants' ability to adjust down or eliminate wages due any Plaintiff or class member by offering individual employee time-edit slips that corrected the oversight. I find that individual issues concerning discrete damage claims do not destroy the cohesiveness of the class and such issues can be handled in the context of a class action. <u>Pearson</u> at 166-167

b.) <u>Meal Period Class</u>

1.) Undue Hardship

Page 10 – ORDER

26

Defendants present evidence and argue that they have no liability under OAR 839-020-0050(2)(b) for failing to pay for an entire 30-minute meal period that was interrupted, if the interruption was due to a patient health and safety issue. (OAR 839-020-0050(4)(d) Defendants, accordingly, maintain that whether this exemption applies requires an analysis on an individualized basis (i.e. Was any 30-minute lunch period interrupted by a patient health or safety issue?). Although there is no hard evidence that this, in fact, occurred, the Court is hard pressed not to accept the fact that this probably did occur and did occur with some degree of frequency.

However, Plaintiffs counter that the exemption is not available to Defendants because there is no proof in the record of compliance with the requirements of OAR 839-020-0050(5) and, in any event, undue hardship is an affirmative defense that was not raised by Defendants in their Answer.

Although this might have been an impediment to the certification of this subclass, the Court does not believe it can deny certification on the record before it.

c.) Pay Card Class

### 1.) <u>Consent</u>

Defendants maintain that there is evidentiary support that separated employees consented or "agreed" under ORS 652.110(4) and (5) to receive final wages by pay card which would constitute an affirmative defense to the claim. Thus, they argue, whether or not each class member did or did not consent requires an individualized analysis that would defeat the cohesiveness of the subclass.

In examining this contention, I have found no real evidentiary support for it. In other words, there is no documentary evidence, (i.e. written agreements, signed consents, notations in employee personnel files) to verify whether this is a legitimate issue. The Court of Appeals in <u>Pearson</u> instructs that for individualized issues of fact or law to predominate over those common to the class, there has to be some affirmative showing of "numerous" instances of individualized treatment or that a "substantial"

JACKSON COUNTY CIRCUIT COURT 100 SOUTH OAKDALE MEDFORD, OR 97501

1	number of class members are impacted. <u>Pearson</u> at p. 156. The defense
2	can't simply throw up a "theoretical defense requiring individual inquiries for
3	which there is little basis in fact". <u>Id</u> . at p.150
	2.) Issues Raised on Motion For Summary Judgment
4	The Court acknowledges that there is pending before it Defendants'
5	Motion for Summary Judgment that makes a serious legal challenge to this
6	claim. In that motion, Defendants assert that, as a matter of law, an ATM
7	fee is not a "deduction" for purposes of ORS 652.610(3) and that ORS
8	652.110 does not create a private right of action for its violation (i.e. issuing
9	a wage payment card without the employee's agreement.) I find these legal
	issues are common to the class and justify class treatment.
10	3.) <u>Conclusion</u>
11	The Court finds that class action treatment of this case is superior to other
12	methods of litigation.
13	IV. Order Read on the foregoing, the Court enters the following Orders:
14	Based on the foregoing, the Court enters the following Orders: 1.) This case is certified as a class action containing the following three subclasses only -
15	Point Click Care Class, Meal Period Class and Pay Card Class;
	2.) Class representatives shall be Maza, Real and Price; and
16	3.) Class counsel shall be Schuck Law LLC.
